Commands for switchover, healing, and switchback 1

Commands for switchover, healing, and switchback

There are specific ONTAP commands for performing the MetroCluster disaster recovery processes.

If you want to...	Use this command...
Verify that switchover can be performed without errors or vetoes.	<code>metrocluster switchover -simulate</code> at the advanced privilege level
Verify that switchback can be performed without errors or vetoes.	<code>metrocluster switchback -simulate</code> at the advanced privilege level
Switch over to the partner nodes (negotiated switchover).	<code>metrocluster switchover</code>
Switch over to the partner nodes (forced switchover).	<code>metrocluster switchover -forced-on-disaster true</code>
Perform data aggregate healing.	<code>metrocluster heal -phase aggregates</code>
Perform root aggregate healing.	<code>metrocluster heal -phase root-aggregates</code>
Switch back to the home nodes.	<code>metrocluster switchback</code>
