# Deleting TI zoning and configuring IOD settings

You must delete the existing TI zoning and reconfigure in-order-delivery (IOD) settings on the switch fabric.

1. Identify the TI zones that are configured on the fabric:

```
zone --show
```

The following example shows the zone FCVI\_TI\_FAB\_2.

```
Brocade-6510:admin> zone --show
Defined TI zone configuration:
TI Zone Name:    FCVI_TI_FAB_2
Port List:       1,0; 1,3; 2,0; 2,3
configured Status: Activated / Failover-Disabled
Enabled Status:  Activated / Failover-Disabled
```

2. Delete the TI zones:

```
zone --delete zone-name
```

The following example shows the deletion of zone FCVI\_TI\_FAB\_2.

```
Brocade-6510:admin> zone --delete FCVI_TI_FAB_2
```

3. Confirm that the zones have been deleted:

```
zone --show
```

The output should be similar to the following:

```
Brocade-6510:admin> zone --show

Defined TI zone configuration:
no TI zone configuration defined
```

4. Save the configuration:

```
cfgsave
```

5. Enable in-order-delivery:

```
iodset
```

6. Select Advanced Performance Tuning (APT) policy 1, the Port Based Routing Policy:

**aptpolicy 1**

7. Disable Dynamic Load Sharing (DLS):

**dlsreset**

8. Verify the IOD settings using the following commands:

**iodshow**

**aptpolicy**

**dlsshow**

The output should be similar to the following:

```
Brocade-6510:admin> iodshow

IOD is set

Brocade-6510:admin> aptpolicy
Current Policy: 1

3 : Default Policy
1: Port Based Routing Policy
2: Device Based Routing Policy (FICON support only)
3: Exchange Based Routing Policy
Brocade-6510:admin> dlsshow

DLS is not set
```
