Switchover, healing, and switchback operations during nondisruptive transition

Depending on the stage of the transition process, the MetroCluster switchover, healing, and switchback operations use either the MetroCluster FC or MetroCluster IP workflow.

The following table shows what workflows are used at different stages of the transition process. In some stages, switchover and switchback are not supported.

- In the MetroCluster FC workflow, the switchover, healing and switchback steps are those used by a MetroCluster FC configuration.
- In the MetroCluster IP workflow, the switchover, healing and switchback steps are those used by a MetroCluster IP configuration.
- In the unified workflow, when both the FC and IP nodes are configured, the steps depend on whether NSO or USO is performed. The details are shown in the table.

For information on the MetroCluster FC and IP workflows for switchover, healing, and switchback, see Understanding MetroCluster data protection and disaster recovery.

Automatic unplanned switchover is not available during the transition process.

Stage of transition	Negotiated switchover uses this workflow	Unplanned switchover uses this workflow
Before the MetroCluster IP nodes have joined the cluster.	MetroCluster FC	MetroCluster FC
After the MetroCluster IP nodes have joined the cluster, before the metrocluster configure command is performed.	Not supported	MetroCluster FC
After the metrocluster configure command has been issued. Volume move can be in progress.	Unified:All remote site nodes remain up and healing is done automatically	 Mirrored aggregates owned by the MetroCluster FC node are mirrored if storage is accessible, all others are degraded after switchover All remote site nodes are able to boot up. Heal aggregate and heal root commands must be run manually.
The MetroCluster FC nodes have been unconfigured.	Not supported	MetroCluster IP

Stage of transition	Negotiated switchover uses this workflow	Unplanned switchover uses this workflow
The cluster unjoin command has been performed on the MetroCluster FC nodes.		MetroCluster IP
